**Energy transition and climate neutrality**  
for Upper Austria

# OÖ Energiesparverband:

active for the energy transition and climate neutrality

## **GOOD ADVICE for the energy transition**

- 10,000 face-to-face energy advice sessions per year for households, companies and municipalities
- Housing programmes: supporting energy-efficient construction and refurbishment (over 200,000 buildings since 1993)
- Energy programmes, replacement of heating systems, photovoltaics, e-mobility
- Competence centre on energy funding

## **COMMUNICATING the energy transition**

- 60 trainings and events with more than 2,000 participants each year
- Publications on key topics
- Regional award "Energiestar", tradeshow
- Awareness campaigns (AdieuÖl, PV), Energy Leaders Upper Austria

## **FINANCING the energy transition**

- Management of regional subsidy programmes
- Subsidy guidance for homeowners, companies and public bodies
- Innovative business models, Energy Contracting Programme

## **Leading by example: MUNICIPALITIES**

- Supporting local energy projects and strategies
- Focus on PV, public lighting, energy communities
- Municipalities as catalysts for the local energy transition and climate neutrality

## **TRAINING for the energy transition and climate neutrality**

- Energy Academy: trainings on energy efficiency, renewables and e-mobility, sustainable construction and refurbishment, innovative financing
- Presentations and training seminars, projects with schools

## **INNOVATIONS for today and tomorrow**

- Energy communities
- Energy transition leaders: pioneers on their way to climate neutrality
- Innovation platform New Energy for Industry (NEFI)
- Energy technology projects
- Solar mobility: e-mobility and PV

## **Cleantech-Cluster: BUSINESS NETWORK**

- Supporting energy technology companies in the Cleantech-Cluster
- Innovation and cooperation projects, networking
- Internationalisation

## **POSITIONING Upper Austria**

- Energy leader region
- World Sustainable Energy Days – one of Europe's largest international conferences on the energy transition and climate neutrality
- EU projects

# Energy transition and climate neutrality in Upper Austria

## Facts and figures

**3.3 billion Euro** annual investments  
in renewables and energy efficiency

**68 %** of all dwellings with  
**climate-friendly heating systems**

**39 %** reduction of greenhouse gas  
**emissions in buildings** in the last 10 years

**33 %** of primary energy  
comes from **renewables**

**16 %** share of **e-cars**  
in new car registrations

More than **25 %** of all small-scale  
**biomass boilers** installed in the EU are  
manufactured by Upper Austrian companies

**65,000** biomass heating systems  
in homes, public buildings and companies:  
37,000 pellet and 28,000 wood chip systems

### The region of Upper Austria

- Capital: Linz
- Population: 1.5 million
- Industrial and rural: 25 % of Austrian industrial exports, 50 % of inhabitants in small municipalities

**85 %** of new  
**single-family homes**  
equipped with **PV**

**43,000** **PV** installations

**Greenhouse gas emission reduction** despite **53 %**  
economic growth in the last 15 years (decoupling  
economic growth and energy consumption)

**84 %** renewable electricity

**300** energy contracting projects  
with 100 million Euro total investments

# OÖ ENERGIESPARVERBAND

OÖ Energiesparverband is the regional energy agency of Upper Austria and the centre for product-independent energy information.

OÖ Energiesparverband drives the energy transition by promoting energy efficiency, renewable energy, e-mobility and innovative energy technologies. It provides comprehensive services to citizens, municipalities and businesses of all sizes. It also supports energy technology companies in the Cleantech-Cluster ([www.ctc-energy.at](http://www.ctc-energy.at)).
